

Osca Sistemas offers tailored solutions in oleohydraulics in the least possible time and with the best quality. We build powerful bonds with our suppliers and improve our production processes continuously with the best available technology orienting all our value chain to the final user.

We are committed to UNE-EN ISO 9001:2015 compliance, which guarantees a quality management system consistent with the values of excellent customer service. We are also committed to the compliance of UNE-EN ISO 3834-2:2005 which guarantees a quality supervision of welded parts, and all requirements corresponding to our stakeholders.
